

## **Electrician**

Intelligent Technology, LLC, a Wood River Federal company, is seeking a certified Electrician to work on a full-scale networking services project for multiple customers worldwide. The project encompasses design, analysis, testing, implementation and installation, site acceptance testing, and project management for network engineering efforts at all network levels. *This job is contingent upon contract award.*

### **Job Duties:**

- Conduct site surveys and determine the electrical and grounding requirements for network equipment installed.
- Validate that existing facility distribution systems (electrical and grounding) are adequate to serve the proposed new network equipment and meet TRD requirements.
- Include all details required to verify existing electrical circuits and grounding bus systems meet TRD requirements.
- Include necessary information for any proposed new electrical circuit or grounding bus required to meet TRD requirements.
- Support all electrical and grounding/bonding tasks related to the install during both install and cutover.
- Support Minor Electrical Support requirements.

### **Skill Requirements:**

- Licensed for the state of Alabama.
- Personnel shall comply with the National Electrical Codes (NEC), laws, and regulations.
- Proof of compliance shall be provided upon request.
