

IP Management - Network Engineer

Intelligent Technology, LLC, a Wood River Federal company, is seeking a IT Management – Network Engineer to manage a full-scale networking services project for multiple customers worldwide. The project encompasses design, analysis, testing, implementation and installation, site acceptance testing, and project management for network engineering efforts at all network levels. *This job is contingent upon contract award.*

Job Duties:

- Effectively plan, manage, and administer Air Force IP (IPv4 and IPv6) address space. Assign, allocate, and redistribute IP address space.
- Coordinate all IP block changes and/or assignments.
- Assign, verify, and validate individual base and user IP addresses and ranges of addresses.
- Respond to requests to identify/locate IP address block owners.
- Participate in meetings and working groups regarding IP addressing and policy.
- Provide technical guidance on IPv6 protocols and potential transition mechanisms to support IPv6 migration activities.
- Support development of IPv6 addressing plan; develop and maintain an IPv6 addressing plan that includes provisions for networks, management systems, weapon systems, and other unique use cases.

Skill Requirements:

- IAT Level II
- Network+ Continuing Education with five (5) years of relevant professional experience OR ten (10) years of experience in Air Force IP Management
- Secret Security Clearance Required
