

# Umyuaq Technology, LLC (U-Tech) Capability Statement

SBA 8(a) ANC | Small Disadvantaged Business | UEI: XTBHXXA5ZLF5 | CAGE 81QP0 | Primary NAICS 541715 541513 | Facility Clearance: SECRET

## Company Overview

U-Tech delivers end-to-end mission support across complex federal environments, combining technical depth, disciplined program execution, and operational resilience to enable mission readiness at scale. We provide enterprise IT, cybersecurity, systems engineering, infrastructure sustainment, and specialized operational support across medical, training, and contingency missions for the Department of Defense and federal civilian agencies. Our teams integrate seamlessly into government operations to deliver secure, scalable solutions that improve reliability, efficiency, and continuity in high-tempo, mission-critical environments.

## Core Competencies

- Enterprise IT Operations & Support
- Cybersecurity / RMF & ATO Support
- Cybersecurity & Information Assurance
- Medical IT Systems Support
- Strategic Mobility & Deployment Support
- Enterprise database management
- Network & Fiber Infrastructure Sustainment

## Differentiators

- Integrate directly into operational units to sustain readiness in real time, supporting medical centers, deployment operations, training environments, and specialized mission teams with personnel who operate independently, securely, and in alignment with mission tempo.
- Portfolio spans enterprise medical IT, strategic mobility, base communications infrastructure, operational sustainment, and specialized maritime support demonstrating the breadth and adaptability to deliver consistent outcomes across highly varied DoD mission environments.
- We execute mature program management, quality control, and cybersecurity discipline meeting QASP requirements, protecting sensitive systems and data, and ensuring uninterrupted service delivery in regulated, safety-critical, and high-risk environments.

## Corporate Experience

- **Madigan Army Medical Center IM/IT Support** IT operations, information assurance, help desk, network, and systems administration support for a multi-clinic military medical enterprise, maintaining secure and reliable clinical and administrative systems.
- **Brooke Army Medical Center IM/IT Support**- Enterprise IM/IT support for a large military medical center, delivering network, systems, cybersecurity, and end-user services
- **Computerized Movement Planning and Status System (COMPASS)** Supported Army strategic mobility by validating unit movement data and enabling force projection.
- **Tyndall AFB Recovery Support Services**- IT and technical support services supporting post-disaster base recovery and operational continuity, including systems administration, network engineering, and infrastructure sustainment for multiple Air Force units.
- **Fiber Optic and Cable Infrastructure Support**- Performed installation, upgrade, testing, and sustainment of copper and fiber optic infrastructure supporting classified and unclassified base networks, ensuring continuity of LAN, MAN, and WAN communications.
- **Dive Locker and Maritime Maintenance Support**- Provided specialized dive locker and maritime maintenance and operational support for Guardian Angel units, ensuring mission readiness, safety compliance, and sustainment of critical rescue, diving, and waterborne equipment.
